EDUCATION

Cornell University, Cornell Tech — New York City, New York, USA
Master of Science in Applied Information Systems — Expected 2023/06

Sichuan University — Chengdu, Sichuan, China
Bachelor of Engineering in Software Engineering — 2016/09 - 2020/06

Key Courseworks: Introduction to Object-Oriented Programming, Probability & Statistics, Database System, Calculus, Data Structures & Algorithmic, Big Data Principle and Application

Awards & Honors: SCU Merit-based Scholarship (2017-2020), NUS Summer Workshop Full Scholarship, National WeChat MiniProgram Contest 3rd Prize, National College Students English Contest 2nd Prize, SCU Elite of Software Engineering Graduate

EXPERTISE

Languages	Python(NumPy, SciPy, pandas, matplotlib, keras), Java, SQL, Javascript, R
Tools	SQL, Axure, Excel, Git, Tableau
English Tests	IELTS: 7.5 (Reading: 9.0/9.0), GRE: 324(Quant 170/170), CET4: 629, CET6: 576

WORKING EXPERIENCE

Bain & Company — Chengdu, Sichuan, China
Part Time Assistant — 2020/12 - NOW

- Working as a secret shopper to conduct store visiting in bars to research the some alcohol drinking sales situation, observing and recording details and filling out the questionnaire;
- Assisting in the scheduling of local PTAs and organizing regional survey data.

Tencent Technology (Chengdu) Ltd. — Chengdu, Sichuan, China
Timi-Studio Product Manager Intern — 2020/05 - 2020/09

- Responsible for the project iteration of the overseas version. Assisting with the project manager to collect and analyze operation activities requirement, using the agile programming and DevOps platform to manage requirement, cooperating with developers and testers to fix bugs, have already been in charge of 5 versions, processed more than 60 requirements and 600 bugs.
- Assisting in the Japanese version publication, including organizing local customer engagement with more than 300 participants and related market research. Conducting related data analysis, business adjustment, localization and game functions adjustment based on the analysis result.

BMW (China) Services Ltd. — Shanghai, China
Open Innovation Intern — 2019/09 - 2020/03

- Extracted and cleaned more than 40,000 records from internal driving behavior database; assisted the engineers conducting data analysis and modeling work through Regression Methods, Artificial Neural Network based on *Python*, as well as the result visualization; assisted in accomplishing 2 autonomous vehicle related patents based on the research conclusions.
- Investigated the main technologies status and the products potential application scenarios of more than 600 tech startups, seeking for opportunities to improve BMW Group mobility products & services. Developed *Python* data crawler program and applied *TianYanCha* API to collect related companies' investment and financing situation, main stakeholders, and scales.
- Accomplished one Internet of Vehicles innovation project with vehicle service provider, used *Node.js* to develop the interface between BMW and IoV provider, accomplished the field test.

RESEARCH EXPERIENCE

Sichuan University Chengdu, Sichuan, China

College of Software Engineering, Graduation Thesis 2020/01 - 2020/05

- Understood the basic principle of blockchain and bitcoin transaction, used *Python* tools to clean and reorganize the transaction database and developed web crawler to expand data fields.
- Applied Google Colaboratory platform to process huge volume of data, analyzed the transaction features such as business category, transaction volume and value, country and region distribution, and applied *matplotlib* library to visualize and present analysis result.
- Learned the basic principle of Long Short Term Memory and applied the method to build a prediction model, calculated the mean square error and mean absolute error and compared the result with traditional neural network models such as CNN, RNN, FFNN.

National University of Singapore Singapore, Singapore

School of Computing, Summer Workshop (Grade: A) 2019/07 - 2019/08

- Project: Big Data and Cloud Computing, Airbnb Price Prediction, advisor: Prof. LEK Hsiang Hui
- Processed more than 70,000 Airbnb records with 26 features, applied regression analysis, Decision Tree Analysis and Random Forests Analysis based R programming to explore the weight of different factors; applied Hierarchical Clustering based Python Programming to explore the price range of similar houses and built a price prediction model

China Collegiate Computing Contest Chengdu, China

National MiniProgram Development Contest (National Third Prize) 2019/03 - 2019/05

- Project: Annoying Health Management Helper
- Functions: Caloric intake and consumption data record in a chatting scenario; data visualization of calorie intake and consumption based on Echarts; an online community to encourage users communicate with others.

EXTRACURRICULAR ACTIVITIES

Sichuan University Tencent Club

Vice President 2019/05 - 2020/04

- Assisted in Tencent Company 2019 fall campus recruit, including campus volunteers recruiting, onsite organization and discipline maintenance, assisting with HR related work. Responsible for communication and cooperation between SCU & Tencent Company. Organized events such as Tencent Open Day, SCU product manager online training, attracted more than 1,000 people.

SK SUNNY International Volunteer Organization

Member 2018/03 - 2018/06

- Conducted a semester-long anti-bully education in a primary school in Chengdu, China. Held the activity every 2 weeks and 5 activities in total, work as project manager in 2 of which.

Sichuan University Student Union

Member 2016/09 - 2017/06

- Assisted the organization and management of important school issues such as the 120th anniversary of SCU, Sichuan University Fall Sports Meet.
